

Rainier Fiber™ Wood Fiber Plus Tackifier

Rainier Fiber™ Plus Tacifier is 100% virgin wood fiber mulch for use in hydraulic planting with the extra holding power of a tacifier. It is premium quality wood mulch, to which a high grade organic tacifier is added to enhance erosion protection. The fiber is consistent in size and texture for the most optimum performance.

When applied over the soil surface, the fibers twist and lock with each other as they dry. With tacifier, the holding power of the fiber to the soil is stronger, providing increased erosion protection. The tacifier also holds the seeds in place and gives extra lubricity to the slurry, which makes pumping and application easier.

ADVANTAGES

- Stronger bonding of the fibers to the soil. Increased erosion protection.
- Pre-mixed blended tacifier disperses into slurry quickly for fast hydration.
- No gum balls as compared to adding tacifier directly in the tank.
- Extra lubricity from the tacifier makes the slurry pump easier.
- Eliminates the mess, waste and irritating dust that results from adding tacifier separately.
- All in one bag. Saves time in handling and mixing.
- Green dye assists in even application. Dye is non-toxic to fish or animals
- Fiber stays in uniform suspension and blends with seed and fertilizer.
- High loading and goes into slurry quickly.
- Forms stable mulching mat and holds the seed in place.
- Helps establish grasses for erosion control, as well as fine turf.
- No viable noxious or other weed and plant seeds in the mulch. All seeds are sterilized.
- Fibers decompose after plants have established.

Rainier Fiber™ Plus Tacifier is fast to load in hydroseeding equipment from easy to handle plastic bags. The fibers are sized for maximum loading in a tank, and they make a homogeneous slurry of water, seed and fertilizer. The fibers remain in suspension during agitation and pumping, and the slurry does not dewater when doing hose work.

APPLICATION

Recommended Rates:

1,800 pounds per acre on flat to 5H:1V slopes

4H:1V slopes use a heavier application
