

S P H I S - .

lawn s and to resist chafer grub infestation.

BENEFITS:

- Gorgeous, dark green colour with lower fertilizer requirements.
- Has the deepest roots of any turf grass, resulting in superior drought tolerance.
- Some resistance against the chafer grub infestations once fully established and has great resistance against turf diseases.
- Slower growing than perennial ryegrass for reduced mowing frequency.
- Produces the least amount of thatch of any turf grass.

SEEDING RATE:

- 3.63-4.54 kgs (8-10 Lbs.) per 92.9 sqm (1000 sq ft.)
- 11.34 kgs (25 Lbs.) covers up to 290 sqm (3125 sq ft)
- 2.27 kgs (5 Lbs.) covers up to 56 sqm (600 sq ft.)

All of our mixes are
