

Chafer Resistant Mix

This mix is formulated for new lawn seedings to combat the chafer grub infestation and for lawn renovations. It utilizes deep-rooted, high endophyte Turf-Type Tall Fescue and Microclover® brand White Clover to help resist turf damage. Microclover® provides nitrogen fixation and drought tolerance which means that this mix requires less fertilizer and longer periods between irrigation.

This mix contains:

- 98% Rhizing Moon Turf-Type Tall Fescue
- 2% Microclover® brand White Clover

Benefits:

- Resists against chafer grub infestation once fully established
- Superior drought tolerance
- Naturally stays green and prevents some weed encroachment

Seeding Rate:

8 - 12 lbs. per 1000 sq. ft.
(3.6 - 5.4 kg. per 100 sq. m.)

Bag Size:

22.7 Kg (50 Lbs.)

Premier Pacific Seeds Ltd. reserves the right to change seed mixes at any time. Premier Pacific Seeds Ltd. ("Premier") warrants that the seeds in this container (the "Seeds") are of the type described on the container within generally accepted industry tolerances. This warranty is in lieu of all other representations or warranties expressed or implied, with respect to the Seeds or crops grown from them, including, but not limited to, any warranty as to variety, description, quality, merchantability or productiveness. The maximum liability of Premier under this warranty is limited to the purchase price of the Seeds. If this warranty is not acceptable to the buyer, the buyer must not plant the Seeds and may return them to Premier in good condition in this container for a full refund of the purchase price.
